

Pine Valley Central School District

Project 10Million

The Emergency Connectivity Fund (ECF) and T-Mobile Project 10Million has provided a limited number of mobile hotspots for students with unreliable internet service at home.

- A mobile hotspot provides a secure internet connection for other devices.
- Through T-Mobile, households will be offered unlimited data through December 2023.
- No payments or financial information required.
- Mobile hotspots will be sent home with the student. Or, option to pick-up at a school district location if needed.

Please complete this form and submit to *Pine Valley Central School* as soon as possible.

Student Name	
Teacher Name	
Parent / Caregiver Name	
Parent / Caregiver Phone Number	
Parent / Caregiver Email Address	

Please confirm the following (all must be checked in order for application to be considered eligible):

- As the parent / caregiver, I confirm that my student does not have an existing internet connection, or the existing connection is too slow to accommodate at-home learning.
- As the parent / caregiver, if approved, I accept that my student will receive a wireless device and data at no charge in order to facilitate distance learning. The wireless device is intended for students' use alone, solely for purposes of the program, and it cannot be sold or transferred to any other person or entity. The internet service provider will provide data service solely to facilitate your participation in distance learning; if data use is excessive usage other than in connection with student's education, the service may be limited, slowed or terminated without notice. On December 31, 2023, wireless service to the device will be discontinued.

Pine Valley Central School District

February 28, 2022

Dear Parents or Guardians,

As part of the Emergency Connectivity Fund (ECF) and T-Mobile's Project 10Million, Pine Valley Central School District has been able to obtain Mobile Hotspots for families that lack adequate internet in rural areas. At this time, we are able to provide a hotspot (one per household) for those families in need. These units will have unlimited data and are able to connect to several laptops and/or tablets at the same time.

Please return this form to your child's teacher and a device will be sent home with instructions on use.

Thank you,

Teri Tenpas
